Andrew Pittman, Asbestos Manager

The EPA requirement for analyzing and reporting asbestos is as follows: A substance that contains less than 1% is not considered to have asbestos even though this may still contain traces of asbestos (just less than 1%). For further information please visit the EPA website at www.epa.gov/iaq/asbestos.html.

All analyses are performed in accordance with the EPA 600/M4-82-020 method. This report must not be reproduced except in full, without written approval from PRO-LAB/SSPTM, Inc. These test results apply only to the samples actually tested. Floor tile is non-homogeneous and results reflect sample content. All samples will be stored for a period of thirty (30) days. The refractive index was determined by using 'Rapidly and Accurately Determining Refractive Indices of Asbestos Fibers by Using Dispersion Staining Method', by S-C. Su. The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. This report must not be used by the client to claim product endorsement by NVLAP, NIST or any other agency of the U.S. Government.
